

Randall Stout

FAIA, RAIC, AAA

Randall Stout, FAIA, RAIC, AAA is the President and Principal-in-Charge of Los Angeles-based Randall Stout Architects, Inc. Since founding his practice in 1996, Stout has designed projects worldwide including prominent museums across North America. His projects are known for dynamic forms, state of the art technology, and environmental sustainability. Considered a visionary whose evocative design aesthetic consistently challenges architectural conventions, Stout creates environments that capture the unique composition of their natural surroundings, while transforming light, shadow, form, and materials into innovative architecture.

A passionate advocate for environmental responsibility, Stout is a LEED accredited architect who lectures widely on the topic of green design at professional summits, focusing on real strategies and solutions for sustainable design both in the U.S. and abroad. Many of his international projects have been recognized for both their high quality design and sustainability including the Steinhude Sea Recreational Facility which was honored with an AIA-COTE Top Ten Green Award and the German SOLTEC 98 Award for "Innovation in Technology."

Having received his Bachelors of Architecture from the University of Tennessee and his Masters from Rice University, Stout remains committed to academia. Regularly serving as a lecturer, adjunct professor, or studio critic at architecture schools, he lectures at colleges and universities across North America. Most recently he has served as the E. Fay Jones Chair of Architecture at the University of Arkansas and the AC Martin Chair in Architecture at the University of Southern California.

Featured in international publications and exhibitions, Stout's projects have been honored with a number of awards for excellence in design. Most recently, the Taubman Museum of Art was recognized for an International Architecture Award from the Chicago Athenaeum and the European Center for Architecture, Art, Design, and Urban Studies. RSA projects are featured in the monograph *Environmental Alchemy: Randall Stout Architects*.
